

You operate "raise knuckle boom" -

EPSILON PALFINGER
DESIGNS THE DIFFERENCE

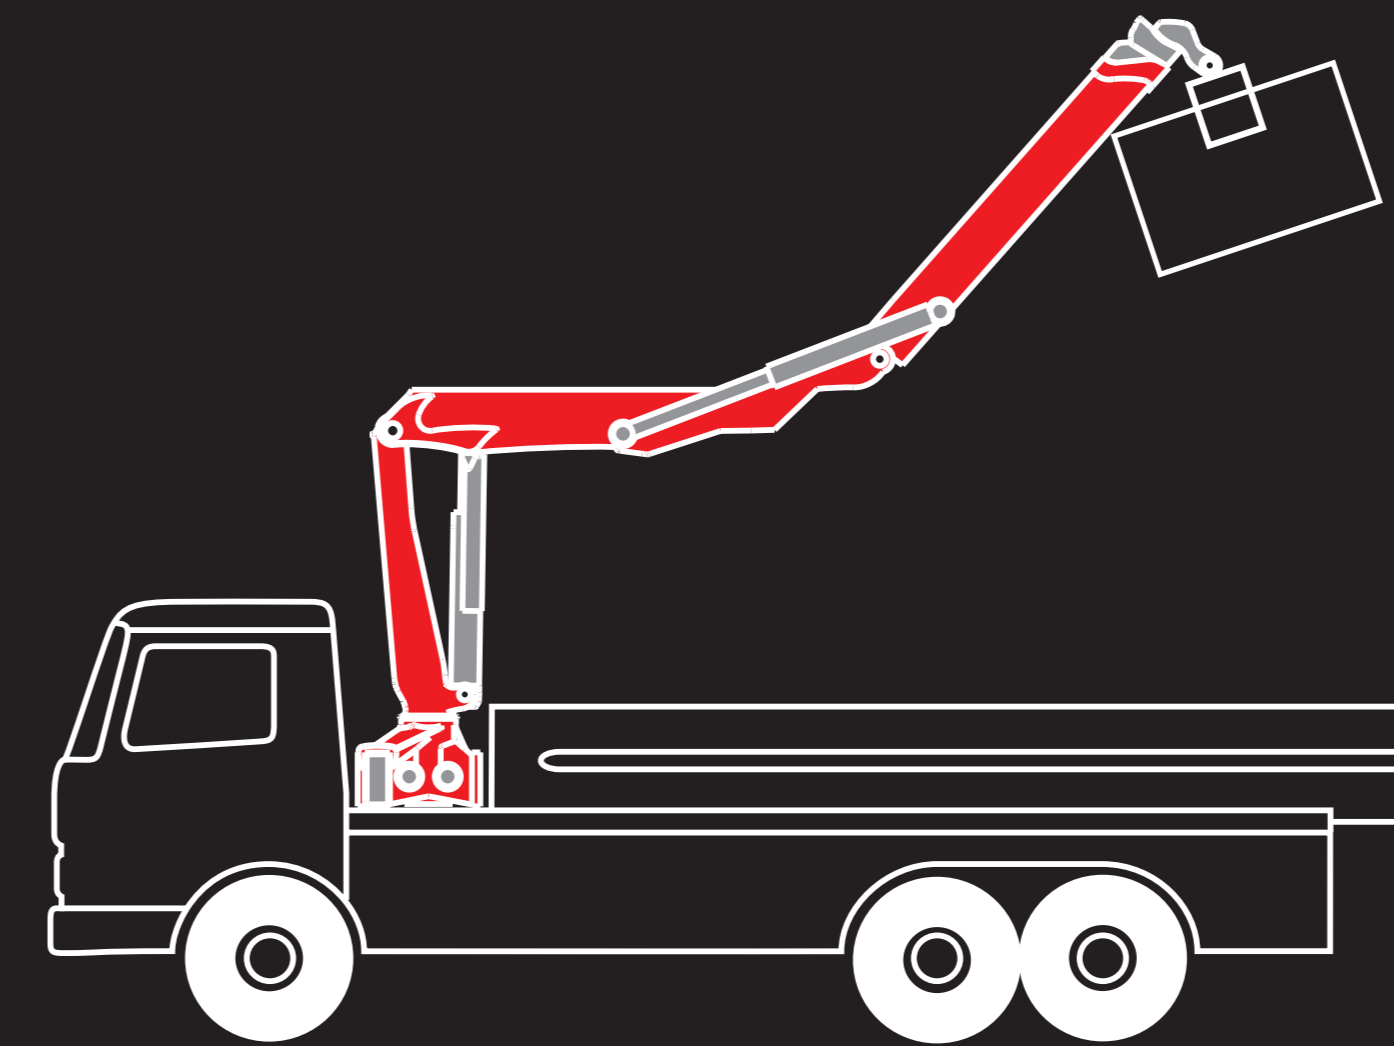

EASY FOLD does the rest

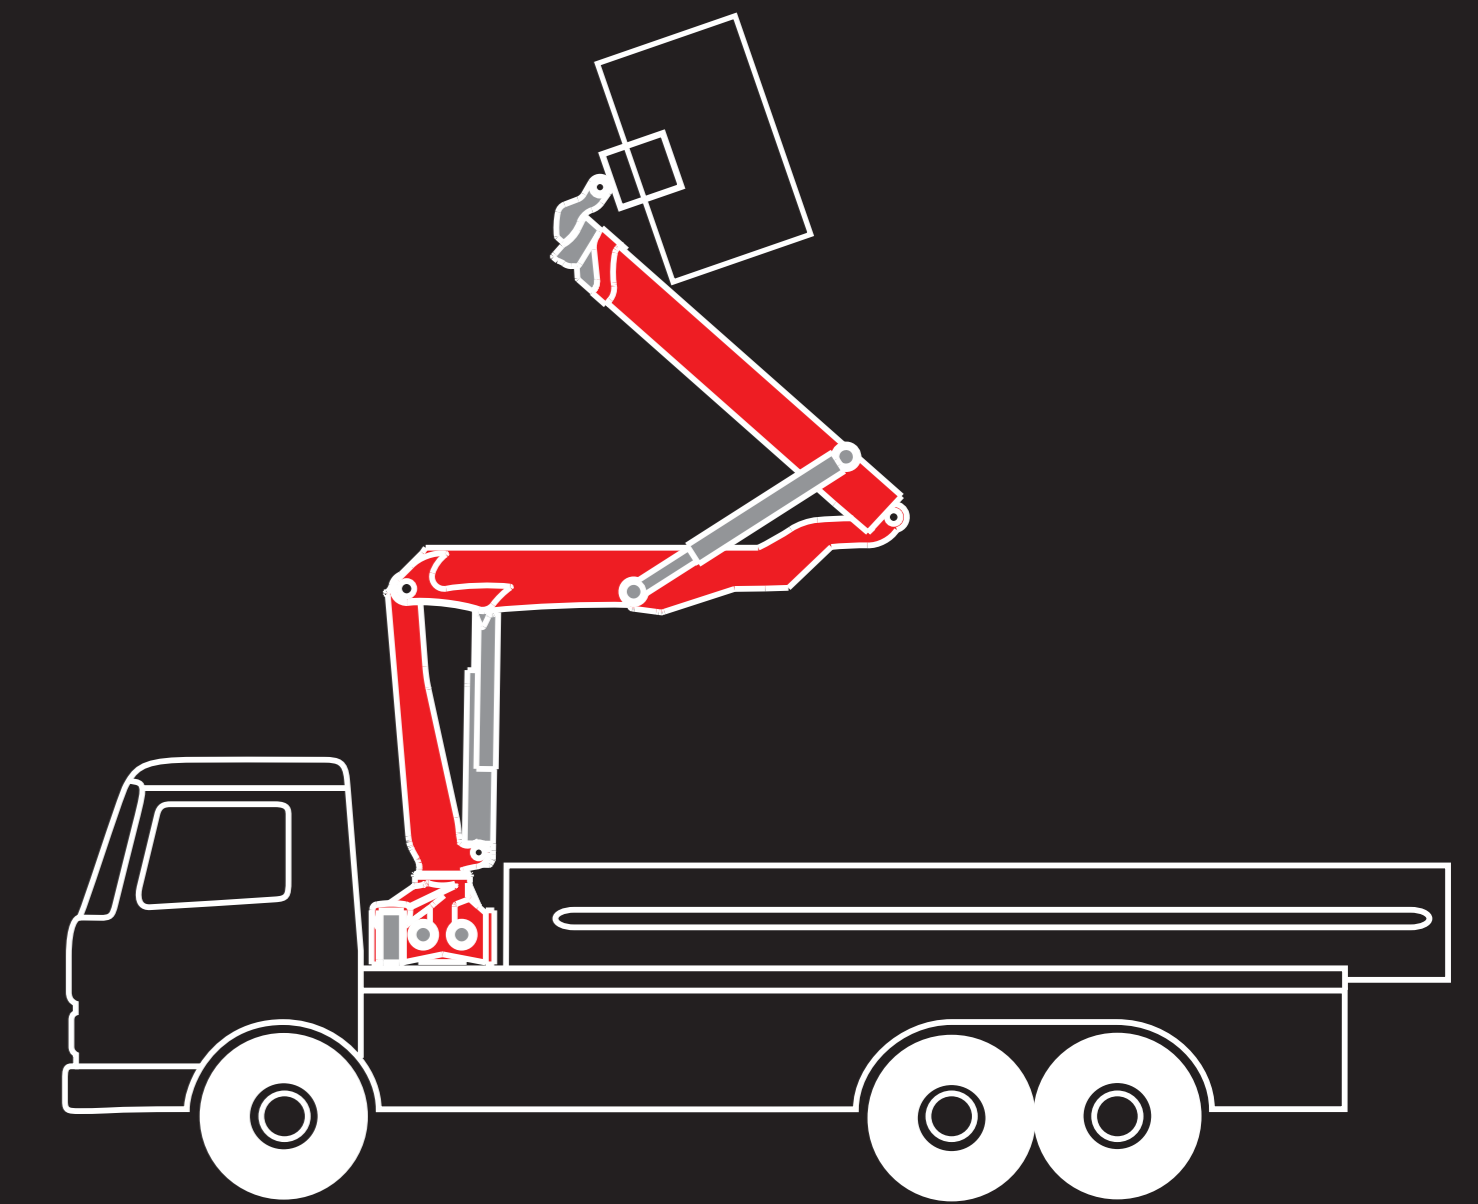

- Patent applied for boom folding system for Tipper Z and Triple Z
- Operation of function "raise outer boom" folds the boom completely
- Support cylinder moves boom over dead spot of knuckle cylinders
- Boom can be folded without resting on ground

1. Knuckle cylinders at end position, automatic switchover from „pushing“ to „pulling“

2. Support cylinder moves boom over dead spot

3. Knuckle cylinders move boom system into parking position
